Materials:
- Popsicle sticks (you can re-use the ones used to stir your slime!)
- A small container filled with hot water for soaking popsicle sticks
- A glass for forming the bracelets (you can get out different sized glasses to make bracelets that will fit around kid and adult wrists!)

How To:
- Ask an adult to boil the popsicle sticks for about 5 minutes
- Soak your popsicle sticks in the warm water (off heat source) for at least 30 more minutes
- When you sticks are soft enough, and not too hot, carefully bend the stick into a c-shape the size of your wrist
- Put the popsicle stick into a glass (keeping it in the curve shape) and leave to dry overnight (about 12 hours)
POPSICLE STICK BRACELETS

• The next day you can decorate your popsicle stick bracelet however you'd like! We used markers and added some string for a better fit.
