

Game Camera Snapshot

Draw your own game camera image! What animal(s) do you see?
What are they doing? What time is it? Fill in the boxes to make
your image like real data!

1. °F	2.	3.	4.

1. What is the temperature? Consider the season of your scene, does your animal hibernate or look different depending on the season?
2. What is the moon phase? Fill in the circle.
Waxing ☉ First quarter ☾ Full ☽ Third quarter ☾ Waning ☉ New moon ●
3. What time of day is it? Is your animal diurnal (awake during the day) or nocturnal (awake at night)? Many game cameras use military time (1:00 - 24:00). Is it night time? The temperature should be cooler.
4. What is the date? Remember to match this with your temperature and season.
